Market Overview: Nigeria

The Federal Republic of Nigeria is a federal state in West Africa. The capital of the country is Abuja. Nigeria borders the Atlantic Ocean and the countries of Cameroon, Chad, Niger and Benin. With a population of over 200 million, Nigeria is the most populous country in Africa and ranks sixth in the world in terms of population. This also explains the great cultural diversity with over 500 different languages spoken. The official language is English.

Nigeria is the largest economy in Africa. After the outbreak of the Corona pandemic and the drop in oil prices initially had a significant negative impact on the Nigerian economy in 2020, the International Monetary Fund even adjusted its growth forecast for 2021 from 1.5 percent of gross domestic product to a real increase of 2.7 percent. However, the growth is still not sufficient to enable a significant improvement in living conditions for more than half of the population living in poverty. This is because despite stable economic growth and a gross domestic product per capita of USD 2,101, the latter is extremely unevenly distributed among the population. This has its origins in the corruption that still dominates the country: The political leadership has been enriching itself through corruption for decades, while the unemployment rate stands at 33 % (2020), according to the National Bureau of Statistics. In addition, most of the working population is employed in the informal sector.

Advans Nigeria is a leading microfinance bank with a national license from the Central Bank of Nigeria (CBN). Since its establishment in February 2013, it has built a strong client base. As a member of the Advans Group, an international group of financial institutions, Advans provides customized financial services to micro-, small and medium enterprises and individuals. Anna Olaiya operates a fabric store in Nigeria and was able to rebuild her store after the lockdown caused by the Corona pandemic with a second loan from Advans. Both the second loan and the reduction in monthly repayment installments helped Anna Olaiya meet the needs of her customers and continue to grow her business.

Risk Management of the Fund

The risk management of the fund ensures a thorough and comprehensive monitoring of the general and specific risks. Our credit risk management is based on a holistic risk approach. Besides MFI- and country-specific risks, regulatory and macroeconomic aspects are considered. Currency risks are to a large extent hedged. To diversify the risks, the investments are subject to certain restrictions:

- Maximum investment per MFI: 10% of the total assets of the IIV Mikrofinanzfonds
- Maximum country weighting: 15% of the total assets of the IIV Mikrofinanzfonds per country
- Selection Criteria: Size of total assets, equity base, loan portfolio quality, profitability and social return

Investment Strategy

The fund invests in loans given to MFIs in emerging and developing countries. The MFIs serve as intermediaries between the IIV Mikrofinanzfonds and the final borrowers. Accordingly, the institutions must be selected conscientiously. The selection process includes a detailed country, financial and sector analysis as well as an on-site review of the MFI. In addition to financial ratios, credit, default and currency risks, comprehensive sustainability criteria are also assessed. Only those MFIs are supported that also meet our criteria regarding ethical and social aspects.

The investments are intended to support the achievement of the following objectives:

Chances

- Low correlation with other asset classes
- Low volatility
- Portfolio diversification
- Social return

Risks

- Country and contraction risks
- Credit and interest rate risks
- Limited liquidity
- Currency risks

Memberships and supported standards of the fund manager

¹¹ As of 31.12.2021. There are two different ways of calculating the share of the respective gender among borrowers: The head count (absolute share) or the share of funds benefiting women and men, respectively (portfolio share). While the absolute share is 80%, the portfolio share is 50%. In principle, we consider both metrics to be equally important. ¹² Source: Advans Nigeria

Founded in 2006 by Edda Schröder, **Invest in Visions GmbH** specializes in **financing sustainable investments**. Currently, more than 1,02 billion euros are managed in the core areas of **microfinance and Impact Investing** (as of April 30, 2022). Invest in Visions provides institutional and private investors with access to investments that offer **social returns** in addition to financial returns, and which have a positive impact on society and the environment.
